

# Create your own Lesson Activity

**For this activity, you will be creating your own lesson! Start by reading the scenario below.**

**Scenario:** You are an educator for the Pennsylvania Game Commission. You arrive at the office one morning to find this email waiting for you:

“Good morning,

My name is Steve Rogers. I teach sixth grade science at a local middle school. Currently we are on our Birds and Mammals of Pennsylvania unit. While speaking with another teacher, they mentioned your educational programs, and I thought it would be a perfect fit for my students!

We have our 45 minute class in Zoom currently so it will be no problem accommodating you and your schedule. Let me know what you think, and I am looking forward to working with you.

All best,

Steve”

**As you can see from the teacher’s email, the topic for this lesson is PA Birds and Mammals. This is a broad theme and can be as general or specific as you and the teacher agree on. For this activity, the direction of the lesson is up to you! You can highlight some of your favorite species, you can focus on adaptations of certain animals, you can focus on certain groups, the possibilities are endless. Research one or several PA birds and mammals and begin to fill in the lesson plan template. Feel free to use a separate piece of paper to sketch out or expand upon your ideas. An example has been provided on the website [here](#). Have fun!**

**EXTENSION:** Present on overview of your lesson plan to the class.

## **Lesson Plan template**

**Summary:**

**Grade Level(s):**

**Setting:**

**Duration:**

**Standards:**

**Vocabulary:**

**Objectives:**

**Background:**

**Materials:**
