

# Wildlife Crime Forensics: Observation Activity

## Test your observation skills!

1. For the first part of the activity, set a timer and study the image below for 3 minutes. Once time is up, set another timer for 3 minutes and list everything that you can recall from the scene. How many items did you list? 10? 20? 50? Compare with a friend or the entire class.
  
2. The second part of the activity is answering the questions below that are specifically about some of the items in the scene.
  - a. Name the color of a rubber band (there were 2)
  - b. How many vertebrae were in the image??
  - c. What size was the ammunition shell?
  - d. How many pinecones were there?
  - e. What type of animal skull was represented? (Carnivore, herbivore, etc.)
  - f. Was there money in the image?
  - g. How many different types of bones can you identify?
