## STATE GAME LANDS No. 074 CLARION & JEFFERSON COUNTIES

Each time a hunter buys a hunting license, the money he spends goes toward many facets of wildlife management. Since 1920, close to a million and a half acres of State Game Lands have been acquired with these funds. Each year nearly \$7,000,000 is spent to improve wildlife habitat. Habitat improvements enhance living conditions for non-game birds and mammals as well as those species which are hunted. Pennsylvania hunters willingly share these lands with the non-hunting public, and with few exceptions, State Game Lands are open for general use year round. Surveys indicate that hunting accounts for only thirty-five percent of game land usage. The remaining sixty-five percent is used by the general public for non-hunting purposes.

“Working Together for Wildlife” is a Game Commission program providing everyone an opportunity to help support wildlife management in the areas for endangered and non-game animals. Monies derived from the “Working Together for Wildlife” Program are being used in Pennsylvania to re-introduce the osprey, river otter, bald eagle, peregrine falcon and provide habitat for other birds and mammals indigenous to the Commonwealth. Construction placement of blue bird houses on State Game Lands provides needed homes for this beautiful songbird. Islands in the Susquehanna River have been set aside as propagations areas for non-game shore birds. Numerous other projects are planned on State Game Lands and other public properties which will also provide food and habitat for non-game wildlife.

The future of Pennsylvania’s wildlife resources requires the concern, cooperation and financial support of everyone, hunters and non-hunters alike. “Working Together for Wildlife” is the answer. Send your contributions to “Working Together for Wildlife”, 2001 Elmerton Avenue, Harrisburg, Pennsylvania 17110-9797.

State Game Land (SGL) 074 contains 6,499.12 acres and located in Clarion and Jefferson Counties in the Pennsylvania Game Commission's Northwest Region and in Wildlife Management Unit 2F. SGL 074 provides a unique landscape and habitat that is attractive to many species of wildlife and provides good hunting and trapping opportunities for Pennsylvania sportsmen.

This "big woods" habitat conditions found on this State Game Lands, as well as several areas maintained in an agricultural setting, provides good hunting and furtaking opportunities. Healthy bear, deer and turkey populations attract a fair number of big game hunters to this SGL. Pheasant stocking also brings fall bird hunters. Fox, coyote and raccoon hunting and trapping opportunities exist, although pressure is light.

Bird watching opportunities exist throughout the SGL. The blend of habitat types allow for the possibility of viewing a variety of species. Hiking the many gated, interior roadways, as well as the Baker Trail, can present easy to moderate challenges for those who wish to traverse the more than 21.8 miles of interior roadways and the portion of the Baker Trail that this SGL has to offer. Fishing opportunities exist in the Clarion River, some of the Big Mill Creek tributaries and in the upper portions

Access is via SR 1011, SR 949, T-342, T-344, T-490, T-534, T-562, T-567, T-568, T-569, T-571, T-572 and T-641. Parking areas are easily accessible from the roadways listed above and all gated, interior roads are open to foot travel with two open to motorized vehicles during the rifle deer season.

The Clarion River is the major drainage for the area with Big Mill Creek and its tributaries providing most of the drainage for the SGL. Soils are composed of materials from rock of sedimentary origin. Invasive species present a problem throughout most areas of the SGL and present management challenges in and around our intensively managed areas. The Game Commission maintains infrastructure including: 20 gates, 19 parking areas, 202 culverts, 3 fords, 1 bridge, 41 miles of boundary line and 21.8 miles interior roadways on this game land. Many natural gas line, power line and utility right-of-ways exist, but gas well activity is light.

The goal for SGL 074 is to maintain it in late successional forested habitat and to maintain mixed successional conditions where opportunities exist.
