State Game Lands (SGL) 212 consists of 504 acres in a single tract situated in Union and Washington townships in extreme eastern Snyder County near the village of Kantz, approximately 2.5 miles south of Selinsgrove.

It lies primarily on rolling topography consisting of forested ridges and hollows with large interspersed herbaceous openings. The surrounding landscape is characterized by low to moderately high ridges and adjacent valleys and is a mixture of agricultural lands, forested ridges and woodlots, and small rural villages. Elevations range from about 440 feet above mean sea level along Middle Creek to approximately 800 feet atop a ridge in the northwestern corner of the Game Lands.

Access to State Game Lands 212 is excellent. From U.S. Route 11/15, Aqueduct Road (TR 381) provides vehicular access from the east to the SGL interior. Dam Hill Road (TR 383) permits public access from the north and bisects the northern portion of the Game Lands. Pine Hollow Road (TR 379) provides access from the southwest. Three parking areas, roadside parking, and several PGC service roads provide pedestrian access to much of the property.

SGL 212 provides a variety of hunting opportunities for deer, bear, turkey, and small game including cottontail rabbits, squirrels, and ring-necked pheasants, as well as hunting and trapping opportunities for furbearers. SGL 212 is excellent small game habitat and regularly is stocked with pheasants during the small-game season. SGL 212 is used by bird watching enthusiasts with both songbirds and other migratory birds using the area.

Each time a hunter buys a hunting license, the money he spends goes toward many facets of wildlife management. Since 1920, close to a million and a half acres of State Game Lands have been acquired with these funds. Each year nearly $7,000,000 is spent to improve wildlife habitat. Habitat improvements enhance living conditions for non-game birds and mammals as well as those species which are hunted. Pennsylvania hunters willingly share these lands with the non-hunting public, and with few exceptions, State Game Lands are open for general use year round. Surveys indicate that hunting accounts for only thirty-five percent of game land usage. The remaining sixty-five percent is used by the general public for non-hunting purposes.

"Working Together for Wildlife" is a Game Commission program providing everyone an opportunity to help support wildlife management in the areas for endangered and non-game animals. Monies derived from the "Working Together for Wildlife" Program are being used in Pennsylvania to reintroduce the osprey, river otter, bald eagle, peregrine falcon and provide habitat for other birds and mammals indigenous to the Commonwealth. Construction placement of blue bird houses on State Game Lands provides needed homes for this beautiful songbird. Islands in the Susquehanna River have been set aside as propagations areas for non-game shore birds. Numerous other projects are planned on State Game Lands and other public lands.
