State Game Lands 220 is in West Cocalico Township, Lancaster County within the Pennsylvania Game Commission’s Southeast Region (Wildlife Management Unit 5B). Deeded acreage is 96.3 acres.

The Game Lands is all one compartment and is accessible from Swamp Church Road (T-816) and Blainsport Rd (L.R. 36074). Two parking lots are maintained and foot travel allows access to all of the game lands. The farthest interior point from a parking area or gate is 0.2 miles.

The principle species hunted are ring-necked pheasants (stocked), doves and eastern cottontail rabbits. There are limited opportunities for hunting squirrels and whitetail deer. Furbearer trapping opportunities include red fox, muskrat, raccoon and mink. Hiking, bird watching and cross-country skiing are lawful recreational activities that occur occasionally. This game lands is small in size and is not a major attraction for these activities.

Topography varies from gently rolling hills to flat creek bottoms. The highest elevation of about 500 feet is found in the fields in the eastern part of the SGL. The lowest elevation of about 470 feet is along the stream in the southwest corner. Soil conditions, existing wetlands, and shrub – scrub habitat present management opportunities for several game species as well as species of greatest conservation need. Management focus will be toward, eastern cottontail and pheasants. In addition to practices geared toward game species, all management activities on Game Lands 220 will consider mammalian and avian species of concern and habitat improvements that can be made at the local level that we believe will bolster populations of these species on a landscape scale. Specific attention will be paid to bird species such as wood thrush, brown thrasher, golden-winged warbler, blue winged warbler and yellow-breasted chat. Habitat generalists including whitetail deer, gray squirrels and morning doves will also benefit from proposed management.

Each time a hunter buys a hunting license, the money he spends goes toward many facets of wildlife management. Since 1920, close to a million and a half acres of State Game Lands have been acquired with these funds. Each year nearly $7,000,000 is spent to improve wildlife habitat. Habitat improvements enhance living conditions for non-game birds and mammals as well as those species which are hunted. Pennsylvania hunters willingly share these lands with the non-hunting public, and with few exceptions, State Game Lands are open for general use year round. Surveys indicate that hunting accounts for only thirty-five percent of game land usage. The remaining sixty-five percent is used by the general public for non-hunting purposes.

"Working Together for Wildlife" is a Game Commission program providing everyone an opportunity to help support wildlife management in the areas for endangered and non-game animals. Monies derived from the "Working Together for Wildlife" Program are being used in Pennsylvania to re-introduce the osprey, river otter, bald eagle, peregrine falcon and provide habitat for other birds and mammals indigenous to the Commonwealth.

Construction placement of blue bird houses on State Game Lands provides needed homes for this beautiful songbird. Islands in the Susquehanna River have been set aside as propagations areas for non-game shore birds. Numerous other projects are planned on State Game Lands and other public lands.
