State game land (SGL) 287 is located in Madison, Pine and Boggs Townships within Armstrong County in Wildlife Management Unit 2D and currently has deeded acreage of 2,008.4 acres. Mahoning Creek and Whiskey Creek both flow through the game lands into the Allegheny River, which borders the western boundaries of SGL 287. Ultimately, this area is part of the Ohio River Basin.

The Game Commission currently maintains five public parking areas on SGL 287. There are five miles of maintained administrative roads throughout SGL 287, providing for public access to this area by foot. All roads are currently closed year-round to public motor vehicle traffic and access is controlled with locked gates. The farthest point on SGL 287 by foot from a parking area or public road is approximately 1 mile. There are no designated trails for horseback riding, mountain biking, and snowmobiling on SGL 287. Multiple gated roads and trails used for management activities and the operation of gas wells provide very nice avenues for hiking, bird watching, and other similar forms of outdoor activities. Additionally, SGL 287 can be accessed from the Allegheny River via a boat ramp located on a small tract of SGL 287 in the town of Templeton.

The terrain of the area is significantly influenced by the Mahoning Creek and its tributaries, resulting in a steep and hilly topography with elevations ranging from 800 feet to 1,500 feet. SGL 287 lies within a mosaic landscape made up of privately held parcels dominated by well connected woodlots and riparian areas interspersed with agricultural areas.

Hunting and furtaking opportunities include white-tailed deer, bear, turkey, ruffed grouse, and squirrel. Furtaking opportunities include raccoon, coyote, and fox. Stocking of ring-necked pheasant occurs on the SGL 287.

"Working Together for Wildlife" is a Game Commission program providing everyone an opportunity to help support wildlife management in the areas for endangered and non-game animals. Monies derived from the "Working Together for Wildlife" Program are being used in Pennsylvania to re-introduce the osprey, river otter, bald eagle, peregrine falcon and provide habitat for other birds and mammals indigenous to the Commonwealth. Construction placement of blue bird houses on State Game Lands provides needed homes for this beautiful songbird. Islands in the Susquehanna River have been set aside as propagations areas for non-game shore birds. Numerous other projects are planned on State Game Lands and other public
