Snow Goose Habitat Mobile

For this activity, students will cut out “Snow Goose Habitat” sign and glue it to the pre-cut cardstock. Then, they will cut out the circles and fill in with information they learned from reading the PGC Wildlife Note on Snow Geese. On the other side of the circles, students may draw snow geese feeding, in their habitat, with their young, or in whatever way they choose. Once the circles are finished, students will use a hole-punch and yarn to attach the circles to the “Snow Goose Habitat” sign. See example picture.
