## STATE GAME LANDS No. 064 POTTER COUNTY

Each time a hunter buys a hunting license, the money he spends goes toward many facets of wildlife management. Since 1920, close to a million and a half acres of State Game Lands have been acquired with these funds. Each year nearly \$7,000,000 is spent to improve wildlife habitat. Habitat improvements enhance living conditions for non-game birds and mammals as well as those species which are hunted. Pennsylvania hunters willingly share these lands with the non-hunting public, and with few exceptions, State Game Lands are open for general use year round. Surveys indicate that hunting accounts for only thirty-five percent of game land usage. The remaining sixty-five percent is used by the general public for non-hunting purposes.

“Working Together for Wildlife” is a Game Commission program providing everyone an opportunity to help support wildlife management in the areas for endangered and non-game animals. Monies derived from the “Working Together for Wildlife” Program are being used in Pennsylvania to re-introduce the osprey, river otter, bald eagle, peregrine falcon and provide habitat for other birds and mammals indigenous to the Commonwealth. Construction placement of blue bird houses on State Game Lands provides needed homes for this beautiful songbird. Islands in the Susquehanna River have been set aside as propagations areas for non-game shore birds. Numerous other projects are planned on State Game Lands and other public properties which will also provide food and habitat for non-game wildlife.

The future of Pennsylvania’s wildlife resources requires the concern, cooperation and financial support of everyone, hunters and non-hunters alike. “Working Together for Wildlife” is the answer. Send your contributions to “Working Together for Wildlife”, 2001 Elmerton Avenue, Harrisburg, Pennsylvania 17110-9797.

PENNSYLVANIA GAME COMMISSION

State Game Lands 64 (8,057 acres) is in two separate tracts in Potter County. The majority in Pike Township with a small portion in Ulysses Township, about 40 air miles northwest of Williamsport and 1 mile north of Galeton Borough. Good access is provided by S.R. 1005. There are 13 parking areas and several gated roads that provide foot access.

SGL 64 is predominantly forested (44% oak, 43% northern hardwood, 7% conifer) Forest age distribution is heavily weighted toward the 81–125-year age class due to limited access, stream crossings and a combination of steepness and soil conditions. The resultant forest cover led the Potter County Natural Heritage Inventory to designate SGL 64 with exceptional significance as a Landscape Conservation Area due to contiguous forest canopy. Although over 90% of SGL 64 is older forest, there are isolated wetlands and patches of early successional cover.

A variety of game species can be found. The more common include white-tailed deer, black bear and gray squirrel. Trappers have opportunity for red and gray foxes, coyote, raccoon, opossum, skunk, beaver, muskrat, mink and bobcat. Game Lands 64 is also recognized in the Northern Allegheny Plateau Important Mammal Area (IMA). Common game birds are wild turkey and ruffed grouse. Forests on SGL 64 also support scarlet tanager, cerulean warbler, long-eared owl, great-horned owl, barred owl, and northern goshawk.

Managing the contiguous nature of this forested area will be a priority for SGL 064. Doing so will provide opportunity to manage habitat for black bear and fisher, and a variety of neotropical migrants listed in the Wildlife Action Plan. Nonetheless, the isolated pockets of early successional habitat will be maintained for wildlife such as woodcock that depend on early seral areas.
