## STATE GAME LANDS No. 089 CLINTON COUNTY

Each time a hunter buys a hunting license, the money he spends goes toward many facets of wildlife management. Since 1920, close to a million and a half acres of State Game Lands have been acquired with these funds. Each year nearly \$7,000,000 is spent to improve wildlife habitat. Habitat improvements enhance living conditions for non-game birds and mammals as well as those species which are hunted. Pennsylvania hunters willingly share these lands with the non-hunting public, and with few exceptions, State Game Lands are open for general use year round. Surveys indicate that hunting accounts for only thirty-five percent of game land usage. The remaining sixty-five percent is used by the general public for non-hunting purposes.

“Working Together for Wildlife” is a Game Commission program providing everyone an opportunity to help support wildlife management in the areas for endangered and non-game animals. Monies derived from the “Working Together for Wildlife” Program are being used in Pennsylvania to re-introduce the osprey, river otter, bald eagle, peregrine falcon and provide habitat for other birds and mammals indigenous to the Commonwealth. Construction placement of blue bird houses on State Game Lands provides needed homes for this beautiful songbird. Islands in the Susquehanna River have been set aside as propagations areas for non-game shore birds. Numerous other projects are planned on State Game Lands and other public properties which will also provide food and habitat for non-game wildlife.

The future of Pennsylvania’s wildlife resources requires the concern, cooperation and financial support of everyone, hunters and non-hunters alike. “Working Together for Wildlife” is the answer. Send your contributions to “Working Together for Wildlife”, 2001 Elmerton Avenue, Harrisburg, Pennsylvania 17110-9797.

State Game Land 089 is located in Colebrook, Gallagher, and Woodward Townships, within rural Clinton County within the Pennsylvania Game Commission's Northcentral Region (Wildlife Management Unit 2G). The Game Land is one contiguous tract. Deeded acreage is 10,571.2 acres. Most of SGL 089 lies on the steep side hills of Lick Run. Lick Run is designated as a "Wild and Scenic River" with elevations ranging from 700 feet at the southern end to 1900 feet near the northern boundary.

The game land can be accessed from the Carrier and Hazard Roads from the north at Haneyville and from the south at Farrandville. The Carrier Road is a State Forest Road open to public travel year-round. The Carrier Road is not plowed or maintained in the winter and it is used as a snowmobile trail. On the eastern side of the game land the Hazard Road is a state game land road and is closed to travel most of the year. The Hazard Road is open to public travel from October to the Middle of January and in the month of May for hunter access.

State Game Lands 089 are located in the heart of Pennsylvania's best bear habitat, heavily hunted for white-tail deer. Other "big woods" mammals that do well on the steep slopes of SGL 089 include coyotes, bobcats, fishers, and Allegheny woodrats.

The forested conditions on SGL 089 (and the surrounding landscape) provide ideal habitat for several bird species of greatest conservation need. These include cerulean warbler, Canada warbler, black-throated blue warbler and black-throated green warbler. These species will continue to benefit from the contiguous forest found on SGL 089. is a popular turkey hunting destination in both the spring and fall seasons. The regenerating clear-cuts are destinations for grouse hunters.

Other recreation opportunities include hiking, berry picking (in and around regenerating timber sales), snowmobiling and trout fishing. Horseback riding and bike riding are also permitted. The parking area along the Hazard Road, at Farrandville, is were most anglers access Lick Run. This is a high quality trout fishery supporting a native brown and brook trout population.
